Review Report

To the Board of Directors of EFG - Hermes Holding Company

Introduction

We have performed a limited review for the accompanying consolidated statement of financial position of EFG – Hermes Holding Company as at 30 September 2021 and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the nine months then ended, and a summary of significant accounting policies and other explanatory notes. The company's management is responsible for the preparation and fair presentation of these interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these consolidated interim financial statements based on our limited review.

Scope of Limited Review

We conducted our limited review in accordance with Egyptian Standard on Review Engagements 2410, "Limited Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the Company, and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these consolidated interim financial statements.

Conclusion

Based on our limited review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements do not present fairly, in all material respects, the consolidated financial position of the Company as at 30 September 2021, and of its consolidated financial performance and its consolidated cash flows for the nine months then ended in accordance with Egyptian Accounting Standards.

Hazem Hassan

Emphasis of Matter:

Without qualifying our opinion as detailed in note No. (35) of the consolidated interim financial statements, most of the world countries, were exposed during 2020 to the new Covid-19 pandemic, and its effect have been extended till date. And as indicated in the aforementioned note, the company's management is currently taking several procedures to counter this risk and reduce its impact on its financial position.

Cairo, November 16, 2021

Notes to the consolidated interim financial statements for the period ended 30 September, 2021
(In the notes all amounts are shown in EGP unless otherwise stated)

1- Background

1-1 Incorporation

EFG-Hermes Holding S.A.E “the company” is an Egyptian Joint Stock Company subject to the provisions of the Capital Market Law No.95 of 1992 and its executive regulations. The company’s registered office is located in Smart Village building No. B129, phase 3, KM 28 Cairo / Alexandria Desert Road, 6 October 12577 Egypt.

1-2 Purpose of the company

EFG Hermes is a premiere financial services corporation that offers diverse investment banking services including securities brokerage, investment banking, Asset management and private equity. In addition to its non-bank finance products, which include leasing and micro-finance, installment services, factoring, securitization, collection and tasquek. The purpose of the company also includes participation in the establishment of companies which issue securities or in increasing their share capital, custody activities, and margin trading.

2- Basis of preparation

2-1 Statement of compliance

These consolidated financial statements have been prepared in accordance with Egyptian Accounting Standards and relevant Egyptian laws and regulations.

2-2 Authorization of the financial statements

The financial statements were authorized for issue in accordance with a resolution of the board of directors on November 16, 2021.

3- Functional and presentation currency

These consolidated financial statements are presented in Egyptian pounds (EGP) which is the Company’s functional currency.

4- Use of estimates and judgments

In preparing these consolidated financial statements, management has made judgements, estimates and assumptions that affect the application of the Group’s accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

- Estimates and assumptions about them are re-viewed on regular basis.

Notes to the consolidated interim financial statements for the period ended 30 September, 2021 (Continued)
(In the notes all amounts are shown in EGP unless otherwise stated)

- The change in accounting estimates is recognized in the period where the estimate is changed whether the change affects only that period, or in the period of change and the future periods if the change affects them both.

4-1 Fair value measurement

- The fair value of financial instruments are determined based on the market value of the financial instrument or similar financial instruments at the date of the financial statements without deducting any estimated future selling costs.
- The value of financial assets are determined by the values of the current purchase prices for those assets, while the value of financial liabilities is determined by the current prices that can be settled by those liabilities.
- In the absence of an active market to determine the fair value of financial instruments, the fair value is estimated using various valuation techniques, taking into consideration the prices of the transactions occurred recently, and guided by the current fair value of other similar tools substantially - discounted cash flow method - or any other evaluation method to get resulting values that can rely on.
- When using the discounted cash flow method as a way to evaluate, the future cash flows are estimated based on the best estimates of management. And the discount rate used is determined in the light of the prevailing market price at the date of the financial statements that are similar in nature and conditions.

5- Assets held for sale

- Assets held for sale represented in the assets that has been acquired by EFG Hermes Corp Solutions amounted to EGP 46,492,925 in exchange of debt account receivables.

Assets held for sale is relating to the acquisition of the following assets:

- Land and buildings.
- Machines and equipment.

* Due to the political situation in Syria, the Group lost its control on the Syrian entities. In 2016, the Group deconsolidated the Syrian companies and changed them to a fully impaired investments at fair value through OCI.

** The Holding Company has the power to govern the financial and operating policies of the mentioned companies then the investees Companies is classified as investments in subsidiaries.

34- Financial instruments and management of related risks:

The Company's financial instruments are represented in the financial assets and liabilities. Financial assets include cash balances with banks, investments and debtors while financial liabilities include loans and creditors. Notes to financial statements includes significant accounting policies applied regarding basis of recognition and measurement of the important financial instruments and related revenues and expenses by the company to minimize the consequences of such risks.

34-1 Market risk

Market risk is defined as the potential loss in both on and off financial position resulting from movements in market risk factors such as foreign exchange rates, interest rates, and equity prices.

Market risk is represented in the factors which affect values, earnings and profits of all securities negotiated in stock exchange or affect the value, earning and profit of a particular security.

According to the company's investment policy, the following procedures are undertaken to reduce the effect of this risk.

- Performing the necessary studies before investment decision in order to verify that investment is made in potential securities.
- Diversification of investments in different sectors and industries.
- Performing continuous studies required to follow up the company's investments and their development.

34-2 Foreign currencies risk

- The foreign currencies exchange risk represents the risk of fluctuation in exchange rates, which in turn affects the company's cash inflows and outflows as well as the value of its assets and liabilities in foreign currencies.
- The company has reevaluate assets and liabilities at the financial position date as disclosed in foreign currency accounting policy.

34-3 Risk management

In the ordinary course of business, the Group is exposed to a variety of risks, the most important of which are liquidity risk, interest rate risk, currency risk, credit risk and market risk. These risks are identified, measured and monitored through various control mechanisms in order to price facilities and products on a risk adjusted basis and to prevent undue risk concentrations.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. They are monitored through the Group's strategic planning process.

34-4 Credit risk

Credit risk is the risk of a person or an organization defaulting in the repayment of their obligations to the Group in respect of the terms and conditions of the credit facilities granted to them by the Group. The management minimizes this risk by spreading its loan portfolio overall economic sectors and by adopting appropriate procedures and controls to evaluate the quality of the credit facilities granted and the creditworthiness

of the borrowers. The credit risk of connected accounts is monitored on a united basis. In addition, the effective credit appraisal procedure for examining applications for credit facilities followed by the Group, adopts as the main criteria the repayment capability and obtaining sufficient collateral. The continuous monitoring of credit accounts and the timely preventive action further minimize, to a large extent, the exposure to credit risk.

34-5 Liquidity risk

Liquidity risk is the risk that the Group will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind and monitors future cash flows and liquidity on daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The Group maintains a portfolio of high marketable and diverse assets that can be easily liquidated in the event of an unforeseen interpretation of cash flow. In addition, the Group maintains statutory deposits with the Central Banks.

The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and to the Group in specific. The Group maintains a solid ratio of high liquid net assets in foreign currencies to deposits and commitments in foreign currencies taking markets conditions into consideration.

34-6 Interest rate risk

Interest rate risk stems from the sensitivity of earnings to future movements in interest rates applied on assets and liabilities.

The Group's management closely monitors interest rate fluctuations on a continuous basis and ensures that assets and liabilities are matched and re-priced in a timely manner. The Group is exposed to interest rate risk as a result of mismatches or gaps in the amounts of assets and liabilities that mature or are re-priced in a given period. The most important source of interest rate risk derives from the lending, funding and investing activities, where fluctuations in interest rates are reflected in interest margins and earnings.

34-7 Equity price risk

Equity price risk is the risk that the value of a portfolio will fall as a result of change in stock prices. Risk factors underlying this type of market risk are a whole range of various equity (and index) prices corresponding to different markets (and currencies/maturities), in which the Group holds equity-related positions.

The Group sets tight limits on equity exposures and the types of equity instruments that traders are allowed to take positions in. Nevertheless, depending on the complexity of financial instruments, equity risk is measured in first cash terms, such as the market value of a stock/index position, and also in price sensitivities, such as sensitivity of the value of a portfolio to changes in the underlying asset price. These measures are applied to an individual position and/or a portfolio of equity products.

34-8 Operational risk

Operational risk is the risk of direct or indirect loss due to an event or action causing failure of technology, process infrastructure, personnel, and other risks having an operational risk impact. The Group seeks to minimize actual or potential losses from operational risk failure through a framework of policies and procedures that identify, assess, control, manage, and report those risks. Controls include effective segregation of duties, access, authorization and reconciliation procedures, staff education and assessment processes.

34-9 Fair value of financial instruments

The fair value of the financial instruments does not substantially deviated from its book value at the financial position date. According to the valuation basis applied, in accounting policies to the assets and liabilities.

34-10 Derivative financial instruments and hedge accounting

- Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value, according to the valuation basis applied, in accounting policies to derivative financial instruments.
- In accordance with an arrangement between the subsidiary, EFG-Hermes Mena Securities Limited Co. and its customers (“the customers”), the Company from time to time enters into fully paid

Shares Swap Transaction Contracts (“the contracts”) with the customers. Under the contracts the customers pay to the Company a pre-determined price, which is essentially the market price at the trade date, in respect of certain reference securities. In return for such shares swap transactions the Company pays to the customers the mark to market price of the reference securities at a pre-determined date (normally after one year). However, the contracts can be terminated at any time by either of the parties, which shall be the affected party.

In order to hedge the price risks with respect to the reference securities under the contracts, the Company enters into back-to-back fully paid Share Swap Transaction Contracts with other subsidiaries, MENA Financial Investments W.L.L. (“MENA-F”) and EFG-Hermes KSA. Accordingly, the Share Swap Transactions are measured at fair value based on underlying reference securities under the contracts.

35- Significant events

With the outbreak of COVID-19 pandemic all over the world, the year 2020 witnesses a slowdown in the economic activities till date. Accordingly, the company's management has formed a taskforce to develop and implement the emergency plan to face these exceptional circumstances. Several measures have been taken, including a plan to split the employee workforce whereby 50% of the employees will work from the office, while the remaining 50% will work remotely from home. The management is closely monitoring the situation to ensure the safety of the company's employees.

36- Significant accounting policies applied

36-1- Basis of consolidation

36-1-1 Business combination

- The Group accounts for business combinations using the acquisition method when control is transferred to the Group.
- The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired.
- Any goodwill that arises is tested annually for impairment, any gain on a bargain purchase is recognized immediately in profit or loss.
- Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities.
- The consideration transferred doesn't include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognized in profit or loss.
- Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not re measured and settlement is accounted for within equity. Otherwise, other contingent consideration is re measured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognized in profit or loss.

36-1-2 Subsidiaries

- Subsidiaries are entities controlled by the Group.
- The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

36-1-3 Non-controlling interests

NCI are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition. Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

36-1-4 Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

36-1-5 Interests in equity-accounted investees

The Group's interests in equity-accounted investees comprise interests in associates and a joint venture. Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies. A joint venture is an arrangement in which the Group has joint control, where by the Group has rights to the net assets of the arrangement. Rather than rights to its assets and obligations for its liabilities.

Interests in associates and the joint venture are accounted for using the equity method. They are initially recognized at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's share of the profit or loss and OCI of equity accounted investees, until the date on which significant influence or joint control ceases.

36-1-6 Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

36-2 Foreign currency

36-2-1 Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of Group companies at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Foreign currency differences are generally recognised in profit or loss and presented within finance costs.

However, foreign currency differences arising from the translation of the following items are recognised in OCI:

- An investment in equity securities designated as at FVOCI (except on impairment, in which case foreign currency differences that have been recognised in OCI are reclassified to profit or loss);
- A financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective and
- Qualifying cash flow hedges to the extent that the hedges are effective.

36-2-2 Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated at the exchange rates at the reporting date. The income and expenses of foreign operations are translated at the exchange rates at the dates of the transactions.

Foreign currency differences are recognized in OCI and accumulated in the translation reserve, except to the extent that the translation difference is allocated to NCI.

When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to NCI. When the Group disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

36-3 Discontinued operation

A discontinued operation is a component of the Group's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group.

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held-for-sale.

When an operation is classified as a discontinued operation, the comparative statement of profit or loss and OCI is re-presented as if the operation had been discontinued from the start of the comparative period.

36-4 Revenue

36-4-1 Gain (loss) on sale of investments

Gain (loss) resulting from sale of investments are recognized on transaction date and measured by the difference between cost and selling price less selling commission and expenses. In case of derecognizing of investments in associates, the difference between the carrying amount and the sum of both the consideration received and cumulative gain or loss that had been recognized in shareholders' equity shall be recognized in income statement.

36-4-2 Dividend income

Dividend income is recognized when declared.

36-4-3 Custody fee

Custody fees are recognized when the service is provided and the invoice is issued.

36-4-4 Interest income and expenses

Interest income and expenses are recognized in the income statement under "Interest income" item or "Interest expenses" by using the effective interest rate method of all instruments bearing interest other than those classified held for trading or which have been classified at inception "fair value through income statement".

36-4-5 Fee and commission income

Fee related to servicing the loan or facility are recognized in income when performing the service while the fees and commissions related

to non-performing or impaired loans are not recognized, instead, they are to be recorded in marginal records off the financial position. Then they are recognized within the income pursuant to the cash basis when the interest income is collected. As for fees which represent an integral part of the actual return on the financial assets, they are treated as an amendment to the rate of actual return.

36-4-6 Brokerage commission

Brokerage commission resulting from purchase of and sale of securities operations in favor of clients are recorded when operation is implemented and the invoice is issued.

36-4-7 Management fee

Management fee is calculated as determined by the management contract of each investment fund & portfolio and recorded on accrual basis.

36-4-8 Incentive fee

Incentive fee is calculated based on certain percentages of the annual return realized by the fund and portfolio, however these incentive fee will not be recognized until revenue realization conditions are satisfied and there is adequate assurance of collection.

36-4-9 Investment property rental income

Rental income from investment property is recognized as revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognized as an integral part of the total rental income, over the term of the lease. Rental income from other property is recognized as other income.

36-4-10 Revenue from micro-finance services

- Revenue from micro-finance services is recognized based on time proportion taking into consideration the rate of return on asset. Revenue yield is recognized in the income statement using the effective interest method for all financial instruments that carry a yield, the effective interest method is the method of measuring

the amortized cost of a financial asset and distributing the revenue over the life of time the relevant instrument. The effective interest rate is the rate that discounts estimated future cash receipts during the expected life of the financial instrument to reach the book value of the financial asset.

- When classifying loans to customers as irregular, no income is recognized on its return and it is recognized in marginal records outside the financial statements and are recognized as revenue in accordance with the cash basis when it is collected.
- The commission income is represented in the value of the difference between the yield of the financing granted micro-enterprises and the accruals of the company's bank by deducting the services provided directly from the amounts collected from the entrepreneurs.
- The benefits and commissions resulting from the performance of the service are recognized, according to the accrual basis as soon as the service is provided to the client unless those revenues cover more of the financial period are recognized on a time proportion basis.
- An administrative commission of 8% of the loan granted to customers is collected on contracting in exchange for the issuance of the loan service and administrative commission revenue are proven in the income statement upon the issuance of the loan to the client.
- A commission delay in payments of premiums is collected at rates agreed upon within the contracts and are recognized as soon as customers delayed payment on the basis of the extended delay.

36-4-11 Gains from securitization

Gains from securitization is measured as the difference between the fair value of the consideration received or is still due to the company at the end of securitization process and the carrying amount of the securitization portfolios in the company's books on the date of the transfer agreement.

36-5 Income tax

Income tax expense comprises current and deferred tax. It is recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in OCI.

36-5-1 Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

36-5-2 Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognized for:

- Temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.
- Taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognized for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans for individual subsidiaries in the Group. Deferred tax assets are

reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. For this purpose, the carrying amount of investment property measured at fair value is presumed to be recovered through sale, and the Group has not rebutted this presumption.

Deferred tax assets and liabilities are offset only if certain criteria are met.

36-6 Property, plant and equipment

36-6-1 Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. The cost of certain items of property, plant and equipment . If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment. Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

36-6-2 Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

36-6-3 Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognized in profit or loss. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term. Land is not depreciated. The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

	Estimated useful life
- Buildings	33.3 - 50 years
- Office furniture, equipment & electrical appliances	2-16.67 years
- Computer equipment	3.33 - 5 years
- Transportation means	3.33 - 8 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

36-6-4 Reclassification to investment property

When the use of a property changes from owner-occupied to investment property.

36-7 Projects under construction

Projects under construction are recognized initially at cost, the book value is amended by any impairment concerning the value of these projects cost includes all expenditures directly attributable to bringing the asset to a working condition for its intended use. Property and equipment under construction are transferred to property and equipment caption when they are completed and are ready for their intended use.

36-8 Intangible assets and goodwill

- Goodwill

Goodwill arising on the acquisition of subsidiaries is measured at cost less accumulated impairment losses.

- Research and development

Expenditure on research activities is recognized in profit or loss as incurred. Development expenditure is capitalised only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Group intends to and has sufficient resources to complete development and to use or sell the asset. Otherwise, it is recognized in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost less accumulated amortisation and any accumulated impairment losses.

- Other intangible assets

Other intangible assets, are measured at cost less accumulated amortisation and any accumulated impairment losses.

36-9 Investment property

Investment property is measured at cost on initial recognition.

Subsequent to initial recognition investment property is measured at cost less accumulated depreciation and impairment loss, if any. Investment property is depreciated on a straight line basis over its useful life. The estimated useful life of investment property is 33 years.

36-10 Assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held-for-sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group's other accounting policies. Impairment losses on initial classification as held-for-sale or held-for distribution and subsequent gains and losses on remeasurement are recognised in profit or loss.

Once classified as held-for-sale, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

36-11 Financial instruments

36-11-1 Recognition and initial measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

36-11-2 Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an instrument-by-instrument basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

36-11-3 Financial assets – Business model assessment

The Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Group's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;

- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Group's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

36-11-4 Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- Contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

36-11-5 Financial assets – Subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

36-11-6 Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

36-11-7 Derecognition

Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

36-11-8 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

36-11-9 Derivative financial instruments and hedge accounting

The Group holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures. Embedded derivatives are separated from the host contract and accounted for separately if the host contract is not a financial asset and certain criteria are met.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognised in profit or loss.

The Group designates certain derivatives as hedging instruments to hedge the variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and interest rates and certain derivatives and non-derivative financial liabilities as hedges of foreign exchange risk on a net investment in a foreign operation.

At inception of designated hedging relationships, the Group documents the risk management objective and strategy for undertaking the hedge. The Group also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognised in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The Group designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the forward element of forward exchange contracts (forward points) is separately accounted for as a cost of hedging and recognised in a costs of hedging reserve within equity.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in the hedging reserve and the cost of hedging reserve is included directly in the initial cost of the non-financial item when it is recognised.

For all other hedged forecast transactions, the amount accumulated in the hedging reserve and the cost of hedging reserve is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in the hedging reserve remains in equity until, for a hedge of a transaction resulting in the recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or,

For other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedged expected future cash flows affect profit or loss.

If the hedged future cash flows are no longer expected to occur, then the amounts that have been accumulated in the hedging reserve and the cost of hedging reserve are immediately reclassified to profit or loss.

Net investment hedges

When a derivative instrument or a non-derivative financial liability is designated as the hedging instrument in a hedge of a net investment in a foreign operation, the effective portion of, for a derivative, changes in the fair value of the hedging instrument or, for a non-derivative, foreign exchange gains and losses is

recognised in OCI and presented in the translation reserve within equity. Any ineffective portion of the changes in the fair value of the derivative or foreign exchange gains and losses on the non-derivative is recognised immediately in profit or loss. The amount recognised in OCI is reclassified to profit or loss as a reclassification adjustment on disposal of the foreign operation.

36-12 Share capital

36-12-1 Ordinary shares

Incremental costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with EAS 24.

36-12-2 Repurchase and reissue of ordinary shares (treasury shares)

When shares recognized as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs is recognized as a deduction from equity. Repurchased shares are classified as treasury shares and are presented in the treasury share reserve. When treasury shares are sold or reissued subsequently, the amount received is recognized as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium.

36-13 Legal reserve

The Company's statutes provides for deduction of a sum equal to 5% of the annual net profit for formation of the legal reserve. Such deduction will be ceased when the total reserve reaches an amount equal to half of the Company's issued capital and when the reserve falls below this limit, it shall be necessary to resume

36-14 Impairment

36-14-1 Non-derivative financial assets

Financial instruments and contract assets

The Group recognises loss allowances for Expected Credit Loss (ECLs) on:

- Financial assets measured at amortised cost;

- Debt investments measured at FVOCI;
- contract assets.

The Group also recognises loss allowances for ECLs on loans receivables.

The Group measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt securities that are determined to have low credit risk at the reporting date; and
- Other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment, that includes forward-looking information.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due, unless it can be rebutted.

The Group considers a financial asset to be in default when:

- The debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- The financial asset is more than 90 days past due unless it can be rebutted.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

36-14-2 Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

36-14-3 Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the debtor;
- A breach of contract such as a default or being more than 90 days past due;
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- It is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- The disappearance of an active market for a security because of financial difficulties.

36-14-4 Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

36-14-5 Write-off

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off the gross carrying amount when the financial asset is 180 days past due based on historical experience of recoveries of similar assets. For corporate customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

36-14-6 Non-financial assets

- At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than, investment property, contract assets and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.
- For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.
- The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.
- An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

- Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.
- An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

36-15 Provisions

Provisions are recognized when the Group has a legal or constructive current obligation as a result of a past event and it's probable that a flow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Provisions are reviewed at the financial position date and amended (when necessary) to represent the best current estimate.

36-16 Treasury bills

Treasury bills are recorded at nominal value and the unearned income is recorded under the item of "creditors and other credit balances". Treasury bills are presented on the financial position net of the unearned income.

36-17 Trade, and notes receivables, debtors and other debit balances

- Trade, notes receivables, debtors and other debit balances are stated at nominal value less impairment losses.
- The Company's lessees and the leased assets are regularly classified & evaluated and their obligations are reduced by the rent value paid in each financial period, and with the assurance of the availability of adequate guarantee to collect the client's rent values.

36-18 Cash and cash equivalents

For the purpose of preparing the statement of cash flows, cash and cash equivalents includes the balances, whose maturity do not exceed three months from the date of acquisition, cash on hand, cheques under collection and due from banks and financial institutions.

36-19 Profit sharing to employees

The holding company pays 10% of its cash dividends as profit sharing to its employees provided that it will not exceed total employees annual salaries. Profit sharing is recognized as a dividend distribution through equity and as a liability when approved by the Company's shareholders.

36-20 Micro-enterprises Receivables

36-20-1 Credit policy

Funding Consideration

- Funding are granted to clients who have previous experience not less than one year in his current activity which is confirmed by the client with adequate documentation and field inquiry.
- Funding are granted to the client which it's installment is suitable according to his predictable income activity and this done throw analyzing client's revenues and expenses and his foreseeable marginal income, and this done by the branches specialists of the company on the prepared form for this purpose(financial study form and credit decision).
- Before grant funding, a client activity field inquiry is done.
- Recording inquiries results about client and guarantor with inquiring forms of the company which reveal client's activity (visit form & Inquiry form).
- The company prohibit grant funding for new client unless the activity is existing with previous one year experience where the granted funds be within a minimum 1 000 EGP and maximum 30 000 EGP with loan duration of 12 months.
- Inquiries for clients are performed by I-Score Company before granting and in case of approval on granting. The credit limit of the client is considered when calculating the client's revenue and expenses.

Client's Life Insurance

The insurance process on the client is performed with the authorized companies from insurance supervisory authority.

Client's Following up

The company keeps specialists in branches from following up all regular clients, and irregular with continuous application of that during finance period with judging on their commitment in paying the remaining installments and this done through recording visits for clients with daily basis and also with data base provided by computer system for all branches all over the republic.

Impairment loss of micro financed loans

The company at the date of the financial statements estimates the impairment loss of micro financed loans, in the light of the basis and rules of granting credit and forming the provisions according to the Board of Directors decision of the Financial Supervisory Authority No. (173) issued on December 21, 2014 to deal with the impairment loss.

36-21 Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in EAS 49.

36-21-1 As a lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee;
- and the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low – value assets and short-term leases, including IT equipment. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

36-21-2 As a lessor

At inception or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, then the Group applies EAS 11 to allocate the consideration in the contract.

The Group applies the derecognition and impairment requirements in EAS 47 to the net investment in the lease. The Group further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

The Group recognises lease payments received under operating leases as income on a straight- line basis over the lease term as part of 'other revenue'.

36-22 Operating segment

A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. The Group's primary format for segment reporting is based on business segment.
